Interim Protection Measures

On the advice of the Director, and in consideration of the fact that there is an urgent need to immediately protect the portion of the population of this species occurring on property where Blue Iguanas have historically been released and property currently directly affected by unpermitted road construction, this Interim Directive therefore:

i. Identifies interim Critical Habitat for the Grand Cayman Blue Iguana as

   as outlined (in red) in the figure below for illustrative purposes.

ii. Requires that in any legally permitted development within this Critical Habitat:
   a) Speed bumps, hard-structured chicanes or other highly effective speed control methods are used to limit the speed of any vehicle on all roads of any kind so as to reduce or minimise the risk of road kill of Blue Iguanas.
   b) Any human residence, farm, or other enterprise within this land shall have covenants attached to all parcels that prohibit all present and future occupants (whether owners or renters) from owning or supporting any outdoor cats or from allowing any dog to roam off leash; and that prohibit any feeding of Blue Iguanas.
   c) Officers and agents of the Department of Environment may control alien species throughout this Critical Habitat.
